---

I can't play Renegade on my new high speed internet at Westwood.

I have no trouble getting into Game Spy to play, but everytime I select westwood online, I get into game listings, select a game, hit start. Then I see the normal game loading screens (testing connection,

Objective screen, Message of the day).

Then I see a neutral colored background with Team scores in the right places and a full game time at the bottom but flashing "Gameplay pending."

Then I see a message box that says "Connection to Server Broken - Please Quit".

Do I need some other type of patch or update other than the autoupdate, or is my game version incompatible, or, or, or ???

Any suggestions?
