ChronojamA popular strategy that works is to put 4 or 5 proxy C4 onto an SBH at a different altitude and position than the intended target.

Result? Mysterious explosions that suddenly happen, best used against groups of enemy snipers or even a humvee sitting there. Not to mention there's a laser rifle right there to finish the job if need be.

lol that would be funny seeing c4 just floating there...

[guy1] Hey, wth is that?

[guy2] Looks like, proxies just comming towards us?

[guy1] Naw it's probably a glitch because EA made this game =P

5 seconds later.....

BOOOOM!

[guy1] and [guy2] *Dead*
