Subject: recs.txt
Posted by Bonzo on Sat, 19 Mar 2005 02:34:27 GMT

its done , now i know 3 player with more than 1000 recs
fact is , with the old recs.txt , brenbot will be crashed
ill got support on #bhs_support
answer on this prob is simple , just edit ur recs.txt and make the rec more than 999

format old :
100;999]%nick is actual competition for the kbps laggers and bigheaders! (%rec recommendations)

format on new must end with higher than 999
like this
998;2000]%nick (your txt)
ill give no example , make your own , or on next release of brenbot there is maybe an update on this recs.txt , but in moment uve do 2 it yourself

last time ill got bad responce on simple copy and paste results from rank-bot
so , supportet channels with this rank-bot on n00bstories
#gw @#cnc-xp +#gsf-clan #baclan +#109thgw2 #k4t.live +#k4t.sniping +#stutu
simply join 1 of them and type !rankstats
