Hey I'm interested in having a more in-depth knowledge of Renegade. Specifically I like knowing statistical info about in-game strategies, like how many c4's does it take to blow a building (or med tank, light tank, character....), how many headshots does it take to kill a specific character with a specific character (and how long does it takes). This could get quite long...

So this thread is ONLY for posting PROVEN, TESTED numbers and statistics. If this thread gets too long hopefully someone at the end will re-post a summary list.
