---

I'm trying to do a project at the moment with renegade and the official maps. When I load gmax it's fine but when I open the file with C&C\_Under.mix (not with .mix on) GMAX crashes on me!

This project I'm not going to say really anything but you'll see it in 1 month's time on the forum with screenshots. As well I'm looking for map testers.

PM if you want to test the maps.
