That isn't my computer you fucking retard.

That's Crimson's computer, IF YOU HAD EVEN LOOKED AT THE IMAGE GALLERY.

She runs a GF3 or 4, with a good load of RAM as well, and usually has 80 FPS in every map...
EXCEPT YOUR RIPOFF OF MY WORK.

You're not going to get thousands of people to play your map. Number one, the community will not host the work of a thief. Number two, I'll be making sure that you're going down if you ever release this map.
