Captkurt01Aircraftkiller<http://www.n00bstories.com/image.gallery.php?folder=185>

The ONLY thing he did to my map was take some DSAPO stuff out and put in heightfield snowdrifts.

HOW CAN YOU HAVE SNOW IN PLACES WHERE IT DOESN'T HAVE SNOW FALLING?

HOW CAN YOU CALL THAT MAP HIS WHEN IT'S OBVIOUSLY GLACIER FLYING, RENAMED, WITH CRAPPY FPS IN A ONE PLAYER GAME! LOOK AT THE FPS, IT HITS 14 AND GOES BELOW.

of all, I did a comparison of FPS's with my map and your map. And mine was only a little lower then yours but you have to remember, I have AI, 8 of them to be exact. And if you really knew anything about what you were talking about, you'd know that. AI does slow down your FPS. And point 2, I did a lot more to this map then your vocalizing. But thanks for the support. And I

Pretty soon, thousands and many thousands will have my version. So thanks for your help, but no thanks. Just get used to it. Your not the only map per here, your just one that tries to take credit for others work, you did not build the models used in your version of Glacier Flying, you did not

on Ass/ck, come down to Earth, get out of your twilight zone.

Oh, and no where did I see and FPS of 14 or below after the game started, so get a faster chip set dude.

OMG, if your reply isn't one of the most hypocritical pieces of shit I've seen yet...

"Pretty soon, thousands and many thousands will have my version". Lol...

First, There aren't thousands and many thousands of players that play Renegade. Second, thousands and many thousands of players will not play it, more like 20 in total, most of them to see what you actually changed in it, and to test it against your allegation that it's better. If they already have ACK's Glacier, why would they download some cheap ripoff from some little kid who isn't mature and skilled enough to make one by himself?

"Your not the only map per here, your just one that tries to take credit for others work, you did not build the models used in your version of Glacier Flying, you did not even come up with the name,

Earth, get out of your twilight zone."

Well obviously he isn't the only mapper here... And look who's talking! You hypocritical POS, how can you attack ACK for "taking credit for others work", when that's all you're doing. You did not build anything in Glacier except for a few shitty little models and AI, you did not even come up with a new name for it. You have no talent, you can't even make your own map, you have to steal from others.

Oh and, "Ass/ck" is that the only thing your tiny, immature little mind can come up with? lol... You are really pathetic.
