Half-Life 2 is longer than Half-Life 1, and half-Life 1 is long. It's just not a very challenging game unless you actually play it on hard (which most people don't). The story may not seem great until you actually play the first one. I've noticed A LOT of people saying it's confusing, and almost ALL of them saying they haven't played the first one... WELL DUH!!!

Halo 1 isn't very optimized because they did a shitty job compiling it from Xbox to PC.

Brothers in Arms is really great, but I beat it in two nights, lol.
