icedog90Yeah, I would also like to run a server but it would cause me to surf REALLY slow. Whenever I use my upload my surfing speed and gaming ping gets really messed up. That's because my upload gets used to the maximum.
Thats why I use netlimiter if i'm uploading something. You can cap the program to a certain number. Its great for it. I limit it to like 80kb/sec so I still have another 20 for other stuff.
