OK I have a

Pentium 3 800 Mhz
384 MB RAM
40 GB Hard Drive
Geforce 4 Ti 4600/Agp 8x
and my question is, why do I have slow down when I put the graphics on highest on renegade...
its just a massive slow down...
is it my graphics card or my CPU or Motherboard and don't forget that I got my computer about 3
years ago...
