Ok I'm a little rusty.

Instal winrar. Go to your file. Right click - add to archive. You will see a pull out saying - split to volume bytes - select out of it's list 600 mb cd.

And then add to archive as normal.

NOW TELL ME WHAT ANIME THAT CLIP IN YOUR SIG IS FROM-I can not place the name.

edit= remember when you need to unzip the files, copy both in to the same folder - then unzip.
