Griever92Rich[HN]That map is made by ACK, is Owned by ACK

ehhh, wrong. thats not completely correct. Most of the map was created by westwood studios. look I can even create the map without any work in Commando. It's in the presets. Heres a screenie.

The part where he says it's owned by ACK is completely correct, the part where he said it was made by ACK would be like 95% correct.

The version in Commando is ACK's, Westwood never finished/released what they had.
