Like with all programs you need a certain level of intelligence to use RenGuard. I got renguard about 3 hours after it was first released and the only problem i had was uninstalling the very first version, and even then it took me 1 min to figure out how to fix it. And renguard crashed about 5 times sense I first got it.

Try reading the readme file and the Beginners Guide. And what Crimson said most likely is what's causing his problem.
