Subject: linux Version doesn't work with WOL Truth or myth?
Posted by mac on Sun, 22 May 2005 16:58:35 GMT

The LFDS is more stable, has less lag, and has the same kind of support from BHS as the Windows FDS. In fact, all the recent nick exploits never applied to the LFDS.

The only thing it doesn't offer is WOL, and I do not believe it even needs it.
