what bullshit
why should just about every server on all of renegade REQUIRE renguard, renguard has so many bugs, mistakes, and fuck ups that it shouldnt be required at all. Why should a bunch of people have to not be able to play renegade online just because it duznt work and it says they dont have it even though they do Wooooooooooo it stops the "big head" cheat how scary i'll take my chances that out of over a 100 servers (usually) i willl pick one that doesnt have a cheater in it. AND not only that but even if there was a cheater in a server the host can ban them THAT IS MY OPINION OF THIS BULLSHIT DOWNLOAD REN "GUARD"   :twisted:
