I went to control panel... it has the following.
- Appearance and Themes
- Network and Internet Connection
- Add or Remove Programs
- Sounds, Speech, and Audio
- Performance and Maintenance
- Printers and Other Hardware
- Users Accounts
- Date, Time, Language, and Regional Options
- Accessibility Options

The only thing I could think of was to go to Users Accounts. It brings up this:

Pick a task
-Change an account
-Create a new account
-Change the way users log on or off

Or pick an account to change
User   User
Computer Administrator   Guest account is off

I clicked the user of Computer Administrator... the options says now..

- Change my name
- Create password
- Change my picture
- Change account type
- Change my .NET passport

Can you tell me what I'm supposed to do? Thanks.
