OK I've installed the core patch 1. First using auto download and got ERROR 17. Then using the standalone. Now when I try to play the game it auto disconnects after displaying:

[10:38] Warning. No WOL Name found. Connecting to WOL will probably fail

[10:38] Trying to connect to server #1...Connected

[10:38] Secure link established.

[10:38] Welcome to RenGuard !

[10:38] To launch Renegade, please click 'Renegade'.

[10:38] Unauthorized file game2.exe has been found in your renegade directory

[10:38] Disconnected from RenGuard network

NOW what did I do wrong and how do I fix it??????
