danpaul88 wrote on Mon, 01 August 2005 19:50lucky you, my RG window is not even visable on my monitor, luckily it is set to auto-launch ren, or i would be stuck...

Not sure where it went but its as if its minimised, but windows claims its not
I also had that problem some time ago. I think the solution is solved if u maximise the window (full width, you know...) or just the other way around, cannot remember...
