I am in Japan on an exchange program(for 10 days). I have run into a problem 8000 km`s from home and I was wondering if someone could help me. I am using a digital camera to save precious memories which I can hopefully share with others. I am 3 days into the exchange and I have run out of memory. I have taken 400 pictures in 3 days and used almost ALL my memory(256 mg).

Could someone donate me hosting for my photos just until I get back to Canada? I zipped the pictures up in a folder and have gotten it down to under 150 megs I think. It is hard to tell because I am on a japanese computer with a japanese keyboard...

I have gotten SmartFTP installed on the computer here and I am hoping it will work. Can someone lend me some spacing on their server with FTP access?

When I get back to Canada I will post some pictures for everyone to see. I just got back from visiting an Original, 1500 year old castle! The same wooden beams. I gtg. It is late at night and I have lots to do.

Arigato(thanks)
Luke

PS. Sorry about any bad spelling or grammar. I:m on a japanese keyboard and nothing is in the right place. oh and the space bar is MINI!!! lol
