I have Renguard installed with 1.037 and it gets thru:

[20:40] Trying to connect to server #1...Connected

[20:40] Secure link established.

[20:40] Welcome to RenGuard , maschif9!

[20:40] To launch Renegade, please click 'Renegade'.

[20:40] Starting Core Patch Pre-Install Check..

And all the scanning and gets past the "this won't take long" message, but...

Then once it gets to the second window, it will go thru 2 blue bars then freeze. So, of course I can't install renguard core patch 1. Any help on a fix for this would be appreciated.
