Quote: To move threads, you can click the "move thread" link in the thread in the list, or checkmark a bunch and click "move" at the top.

Where are the checkboxes? I don't see them on the forum page, and I don't see an option to go to the moderator forum options like in phpBB. (I'm just doing them one at a time right now...)

I'm going through the unsorted forum.
