gsx600rap wrote on Fri, 26 August 2005 10:57aha! i know what u mean on the xphaze server! let me explain. i was running RG, i was a engineer on gdi. it was field i think, and i was disarming mines in tunnel. at the same time i was disarming, someone on nod was overmining,so a lot of mines disappeared and thats why it seemed i had some repaircheat. i was kicked then before i could tell the man they were overmining. i tried to join again to explain, but couldn't get in, nor could i on other xphaze servers.
at the time, i laughed cause they were overmining and the mines disappeared but next i got kicked and then banned from RG.
i hope u can remove the ban after reading this.
greetings, GSX.

Load of bull. I remember you in the server, you were repairing tanks double quicktime.
We had three Artys hittin that Med, and one hottie aint gunna save it. But you did. Load of crap.
