[Dead-6 Guy

second u liar now u say my comp is the problem.. i purposely tryed to change the data or something...(LOL WE ARE NOT IN A MOVIE OR MATRIX) u change u'r mind all the time man.... i got a normal computer a normal game ... and now u making excuse of this ??? is that u'r reason???? u came so far for this???? to tell me my data is fucked up so i got advantage or something.... lol....man....

u simply suck. (u got no argument, u got nothing except the fact that i used the zoom thing) really find another explanation.

i'll send the video to u'r friend (kenzor can u send me a message again please??)

Holy fucking shit. Not to flame you outright, but you are incredibly retarded. I can't help but flame you for your second batch of triple posting and lack of comprehension. Holy SHIT you are stupid. Okay, there, that's done. Business time. Actually you'll be flamed as I go along, because you've earned it.

You're right, jackpipe, we're not in a movie or the Matrix. We're in a world where our C&C games will load local data in preference to monolithic MIX formatted files. That includes cheating aids of several sorts. Including your precious 100%-clear-scope, unless somehow you figured out how the fuck to add it to the always.dat MIX.. and I'm pretty sure you wouldn't know how and wouldn't be able to even if I wrote it up in 4 languages, including in picture-book form.

I haven't changed my damn mind a single time. I say you're a cheater here, I say you're a cheater there. You have Renardin's same psychological disorder where you think that just because I post the SAME THING TWO PLACES that suddenly it means I've changed my mind. What the fuck kind of thinking is that?

A normal computer and normal game eh? Which of many processors is normal to you? Which OS? Which version of Renegade.. CP1? CP1 beta? RenGuard in there? Nonstandard skins? I'm nitpicking here, I know, but it's still a valid point-- you clearly have an entirely different experience when you play than anybody with the "normal" game, meaning freshly installed and patched up to current WW/EA versions.

To follow your erratic, fucked speech... mi'r reason for all of this is that you are a cheating slut and made no effort to hide it, while at the same time claiming you don't cheat and offering this video up as proof. Hell, Renardin even offered it up as proof for you, vouching for you. Then you tried to say it's not meant to prove anything. So one of you must be lying right there.

And no, I don't suck. I will say on a whim that I am way the hell better than you, and I bet most people would believe that even without seeing us play simultaneously. And Kanezor is NOT my friend either =P He's a little n00bjet fanboy, right Kanezor? ^_-

Edit: The movie? No. Sure, CS has collision detection fuckups. Renegade DOES NOT. Hell, Renardin even cites Renegade's excellent collision detection for why he plays it instead of playing CS!!
