I'm somewhat confused by your posts, but let's make sure:

Have you completely uninstalled and then reinstalled?

Like, run the C&C Renegade Uninstaller, then make sure that C:\Westwood\Renegade was removed from your hard drive, then run regedit and remove the registry key (and all sub-keys) HKEY_LOCAL_MACHINE_\SOFTWARE\Westwood\Renegade.

Then once you've done that, reinstall. Let us know when you've verified you've done exactly that.
