I don't know, but have you also first downloaded and installed the official patch?

The correct staps for installing are.

Install Renegade
Download official patch at ftp://ftp.westwood.com/pub/renegade/updates/, or try to use auto-update
Install patch
Download Core Patch
install corepatch.

Hope this helps for you.

And as a warning, If this really did help, I would advise not to look back at this topic.
Your question has probably been asked earlier by someone, and the forum monkeys get angry when they see people asking questions, they already have answered.
