Yea I changed my mind on what I said, without the nazi's or some of hitlers hencemen/technician there wouldn't have been none space travel, maybe non atomic bomb. If he wouldn't have existed ofcourse there's so many people that have died. But war increases the speed of technolegy being introduced and produced.
Just saying if that would of hapend history would have changed so fucking drasticly. I just said it because of ra1

Really, I'm happy the way it is now there's certain times in my life I dislike and would want to scrap. But im still young and I have experienced many thing's and I've seen alot of things people of my age normally wouldn't.
