My ideas

"Incoming!"
 -yeah

"Hold your fire"
 -When people in your stealth rush are firing and blowing everyones cover
-When you're trying to havester walk and you team is trying to destroy it

"Situation under control"
 -Say a building is under attack and your team is yelling desperately to have it repaired, and you go and repair it, this command kinda stops the panic. eg.
"Building needs repair!" x5
"Negative."
"Situation under control."

"Situation critical"
 -Would be really useful for emphasising commands eg.
    "Building needs repair!"
    "Situation critical!"

"Enemy in our base!"
-yeah
