Funny story this, i was playing on the AUG sniper server and i noticed IKAIKA was playing better then what he normally does, so i typed !rg ika and it came back that he was using RG, so i went on IRC and i typed !rglocate IKA and guess what i found...

Yeah you got it he wasnt using RG so i PMed him saying why arent you using RG he said oh i am but my RG must of crashed..

Now i was thinking if he's RG really did crash then RG would of took him offline (because it does with me every single time).

So after a chat with my mate we both agreed that it would have to be SSC, So i went back into his server and i checked for RG again and i got the same response so i did !rg evil and it came back that he was, so i rglocated him and you never guess what.. yeah same story.. so i typed "so IKA's and Evils rg have both crashed eh?" and all i got was dont worry Caveman is nub and some after shit, so he offers a ss so i say yeah go on then why not.. damn man that ss took FOREVER to be produced.

I then told him to go on IRC and type !rglocate IKAIKA (I did IKA but that doesnt matter at all) and he said that Brenbot 1.41 was saying he was, now i use the same bot and its saying it wasnt... so one of the bots must be lying right? we continued with the agueing and i just simple said give me a ss with Your bot saying that you are using it, I got this;
http://www.frontlines-gaming.com/ikaikas/see.JPG

Now thats not much to go on but it took FOREVER again for that.. so i said ok lets do this the easiet way, give me the IRC ill come on do the command see what it says and leave, he REFUSED point blank to give me it, he said, Its personal only i have it.. Now that is bollox because ive seen other displaying messages.. so he just couldnt accept that i found out.. I left the server.. (i have no way of telling if he and/or evil are cheating)

Here are the screenshots i took

Have fun IKA
