gotwhiskey wrote on Mon, 14 November 2005 12:58My server is currently on gsa.  How do I switch it over too xwis?  The server isn't actually at my house, but I do have FTP access to all the config files.

Does you hoster have Remote Desktop access? if so ask him to run the program and it will patch the needed files, other then that i dont think you can untill xwis makes the change itself.
(WOL - XWIS) then you can host it by changing the setting in server.ini
