One of my favorites

Requirements:

SBH with timed C4 and remote C4 (just timed c4 works as well but remote has added benefits)

Directions:

Sneak around as SBH looking for tanks in the field. Sneak up and plant your remote C4'S followed by the timed C4 (Stay stealth and out of range by approaching from behind or a blind spot). Retreat and wait for the timed C4 to blow. At this point many people oblivios to the fact that C4 just randomly appeared on thier vehicle will get out (as 90% of drivers are engis,techs or hotties) to fix up the dmg. Make sure you are close but not 2 close. Run in and grab the vehicle . If they don't exit or start to return to there base or be healed by an engi blow the remote C4, 1 timed + 2 remotes is enough to kill any tank except for a mammy. Remember captured vehicles count towards your ENEMY'S vech limit, so they can be good to store in back of base as a denial of useage.

Comments welcome

-Matthew
