havvok wrote on Thu, 01 December 2005 15:38My friend nuked my computer with a virus I had some backup, lost most of everything. I'm just curious, what should I do? Should I:

A) Nuke him back
B) Kick his ass
C) Do nothing and hope he doesn't do it again

If you have a better idea, post it.
get him drunk, slip some sleeping tablets into his drinks, drive him halfway across the country once he's unconscious and leave him asleep in a field, then drive home.

It'll take him a LONG time to hitch back, believe me, I know.
