Aircraftkiller wrote on Thu, 01 December 2005 15:29Awesome, more images from 3DS instead of W3D Viewer\in-game!

Unless I'm horribly mistaken, the Colt model for RA: APB is not an in game render. Anyway, it really doesnt matter if it is/isnt shown in game or not. What matters is that we actually get to see what the model and texture looks like. It'd probably look very similar on the W3D viewer anyway.
