hey fl00ded, I know that IKA IKA is a good sniper i've played many games against him, but for that game it was either I was playing crap or he could of been playing really good. (I am not saying he was cheating, you can finds ways to bypass RG but that doesnt mean you're cheating right?) My bot IS config'd properly, fl00ded you should know that you use to mod it.

If people read this and choose to think that IKA was/has/is cheating then sorry but i cant do anything about that people has their own opinions. I tried contacting IKA via GSA and MSN but most of the time he'd either ignore me or just say some shit. Hence why i came here. If i thought someone was cheating i would be the first person to stick their hands up and say yeah he is cheating, but because i dont think he was cheating im not gonna do that.

This thread has gone on way to long.
