Subject: Re: ZoneAlarm (or is it XFire?) and Renguard doesn't play well
Posted by Ma1kel on Fri, 06 Jan 2006 14:56:39 GMT

I'm not sure if this will work, but try this:

1.Open RenGuard and go to "Options".
2.Check the box "Load on startup".

RenGuard should automaticly open Renegade when RenGuard is opened, does Xfire/GSA open up your Game.exe or Game2.exe?

Also make sure that ZoneAlarm allows RenGuard to connect to the master server.
