That fixed the LE crashing problem, thanks for that.

The SAM sites used JFW_Base_Defense_No_Aircraft, (something like that) while I should have used the No_VTOL version instead. The No_VTOL version doesn't ask for exact VTOL vehicle presets.

But now the map crashes after loading about 95%... I think one of the moded presets makes the crash happen but I don't know which exactly. I'll try to find it...
