Well the resolution for the HD TV is enough for I want to do:

this screen can handle : 1366 x 768 pixels

http://www.pricescan.com/electronics/items/item524928.asp

Sony KLV-S32A10 bravia

And to support that I have aquite decent computer as Icedog said:

2GB DDR RAM PC3200
Athlon 64 3500+
7200RPM SATA HDD
Geforce 6800GT AGP8X 256 MB DDR3

Anyway, I still need to buy one of those Dvi to HDMI cable to get the stuff on the TV. The cost is a bit high: 92 Euros (like 100 dollars for one) And I need to save a bit my money this month for other stuff, Once I get the money next month I will post screenshots with some game tests on that huge 'computer screen'.

(and IKEA rules.)
