I just noticed the front bumper has not texture on the renders. I noticed it in-game and fixed it. I will draw up another render in a second. I'm almost finished, I have the presets done, the firing sound added in courtesy on pendullum and everything seems to be working fine.

I added a lot of polygons to the treads, it makes them look great when you're going over terrain.

I still need to add the damn logo, aswell as size up the bounding box, I made it a bit too small.

The HUD element consists of a circular compass with a green needle pointing North (N). Below the compass is a green health bar with a white cross symbol and the number '100' above it. The text 'EVA' is visible to the right of the health bar.
