I'd which. Thanx for the advice tho, but like I said, the game.exe turns into another file, one which I cannot run renegade with. My brother (who's on the same network) has the same problem now, but ren at my dad's PC is fine.

I did an AVG scan in windowns save mode and it found nothing. Neigher does any of the antispyware utilities that I have.
Damn Im sick of this! I'll just format the damned thing >:( .
Thanx for yur time tho.

Cya around.
