reckneya wrote on Mon, 30 January 2006 17:20If I delete the file and reinstall a fresh downloaded crack, it will not run renguard. So I uninstall renguard with the renguard installer and the reinstall it. After I did that the 4 mb crack turns somehow into a 312 kb game.exe. I repeated this step twice to see if there is some other explaination, but everytime the same result.
Could it be this "crack" of yours was the file containing the virus?
