Subject: NightReg Install prob yo Posted by Kamuix on Sun, 05 Feb 2006 01:34:54 GMT

I keep getting this and it doesn't matter where i try to install NR.

The first time it installed was the only time it worked but it failed to install because my AV had a problem with a file it was trying to write.

I thought maybe it threw unwanted files into the Registry but even if it did i have no clue where in the registry it would be.

Thanks for any help.
