The only skins I use are:

A Dot Reticle (May make it harder to snipe for some people)

Glowing vechiles (not what it sounds this is a good pack and makes all the vechiles look more realistic and worn)

You were ownt !!! Nuke (writes you were ownt on the nuke explosion)

Beacon countdown not actually a skin (ok I confess this maybe a advantage but I love this pack)

I heard that some people are able to increase the size of there opponents heads to increase the ability of landing a headshot nw if that is possible it sucks.
