Banlist (Nickname bans)

IPban (IP bans)

RGban (RenGuard Serial hash bans)

You have to search these three tables to unban a player.

To do this you can use for example:

[http://www.multiplayerdownloads.net/downloads/ren/tools/SQLi teManagerSetup.exe](http://www.multiplayerdownloads.net/downloads/ren/tools/SQLi%20teManagerSetup.exe)

edit:

Of course, if you know under what nickname the guy got banned,
it is easiest to do from IRC:

!banlog nickname

!delban <ID>
