For client players, download and run <http://download.renguard.com/cp2>. It will download Core Patch 2 Release Candidate 1. When the final version of Core Patch 2 is released, clients will get scripts.dll 2.3.1. Server owners can choose from scripts.dll 2.3.1 or 2.3.2.

For linux servers with Core Patch 1 already installed, download <http://download.renguard.com/cp2>. For linux servers without Core Patch 1, download <http://download.renguard.com/cp2>. For windows servers with Core Patch 1 already installed, download <http://download.renguard.com/cp2>. For windows servers without Core Patch 1, download <http://download.renguard.com/cp2>. The linux installer uses make itself to make the installer and the windows installer uses Nullsoft Installer to fix this so that the option is available.

The following issues are currently known:  
The windows installer does not patch the correct file to fix this so that the option is available.

Please report any issues with Core Patch 2 Release Candidate 1 on these forums so everything can be kept in the one place. If it is something that is known, please report it here.

**Core Patch 2 Introduction**  
=====

Blackhand Studios(TM) proudly presents "Core Patch 2". This is the 2nd unofficial patch for C&C Renegade. In this Read Me you'll find more enhancements and fixes to make your gaming experience much more enjoyable. Some of the enhancements made where applied to the Harvester. It no longer Spawns invisible when you lose the Power Plant. It's mechanical arms are now animated while it collects Tiberium. With a faster load time( as fast as 'Ren Alert') and many more Console Commands and enhancements (thanks to scripts.dll 2.3.1), this 2nd installment from Blackhand Studios should pack quite a punch.

Along with this release comes additional maps. C&C\_BunkersTS, C&C\_Terrace, and C&C\_Tropics have been added to the mix along with a new map specially created for Core Patch 2 by Titan1x77 called C&C\_Last\_Stand.
