Oblivion165 wrote on Wed, 08 February 2006 09:59An open source browser is the worst idea ever, it just allows them to know exactly what to code around.

Its like having a lock and there isnt a cover over the tumblers.

It's not the worst idea ever, it boosts community support amongst programmers and developers, allowing for hundreds of plug-ins to be created. It also generates media interest and expands the product's lifecycle.
