snipgod wrote on Thu, 09 February 2006 04:49the reason none of you know any of my names are because you stay in you little "renguard protected servers" where anyone can walk in with a renguard bypass and be praised as such an excellent player, because they have renguard on. if the mods of those servers took the time to test people even if they had renguard on, they would notice that some of them have cheats. Its not that hard. And no, a simple big head cheat will not work because only an idiot would use big head. I spend my time in the servers that count. the servers that have good people in them. I play in the Fnsrv, LTserv and EVO servers. the place where if you get one kill some n00b doesnt try and forcerenguard you. I have seen people in games with renguard that have gone through with 20 kills and 2 deaths, here i come in and i get one head shot. i get forcerg'ed. In the fnfall servers i have caught so many damn cheaters who have tried to weasel their way out of a test by saying "but i have renguard, i dont cheat" My responce to that is, if you have renguard and you dont cheat then you shouldnt have a problem with going through a test and supplying a screen shot. Do they do this? no they chicken out because they know they are going to get caught. My rule in servers is, you refuse a test, you are banned. Not to mention all the damned n00bs who have come in, cheated, taken the test thinking renguard will protect them, and fail the bones.ini test. So word to the wise here, renguard does its job for the stupid cheaters, the new ones that dont know crap. but for the few that know something about renegade and how it works, they get by it easily. This is where mods come in. All i am saying is get a better moderation team on your servers and you may actually achieve the once thought impossible, a cheat free server. And yes, i am sorry for what i did. I miss renegade everyday and i cant believe i was such an idiot for doing it. I am also sorry for the post i made starting this topic, it was written in a very angry state of mind. But yes, i do take responcibility for my actions. I am no asking for an unbanment, all i am asking is for the acceptance of my apology. Crimson i am sorry for what i did, The owner of the Xphaze Bot, i am sorry for spamming it i was in a childish mood at the time. all i can hope for is for you to accept my apology. Thank you

OMG paragraphs!
