Subject: rg password auto auth
Posted by sycar on Wed, 22 Feb 2006 19:10:47 GMT

Hi guys,

I've set up protected users for the admins on my ren server, however using the renguard password box to authorise myself automatically doesn't work and if i don't have time to open irc up i get kicked.

Does anyone know about this problem or if its common and if there is what is the fix for it? I've seen it mentioned before in earlier posts but those were years ago, and hopefully its been fixed now.

Thanks for any help
buffymaniack

By the way i am running brenbot 1.41
