I have somewhat the same problem. But my RenGuard keeps finding an error and telling to download the corrupt files(maps). I have, and it keeps finding an error in the C&C_FieldTS.mix file I download. Heres a screenshot of it:

http://tibwar.hl2gamer.com/Files/Errors/RenGuard/renguard_error.PNG

I've downloaded and extracted the C&C_FieldTS file several times, and it won't download CP1.

Help would be much appreciated.

Thanks,
Nuclear General

EDIT: I think I know what the problem is. The file C&C_FieldTS.zip file that RenGuard tells me to download is messed up, cuz XCC Mixer will not open it. It just gets an error and closes, but it opens every other .MIX file in the Ren/Data dir. So if someone can upload or send me the C&C_FieldTS.mix file, I would appreciate it. Also, I think a RenGuard staff member should fix that file for download(Just a suggestion).

Thanks.
