well, i was having a play around with water effects and stuff, but i got this simple map with water and ground... problem is, the water dosn't show up in renegade, but it does show up in level edit... weird:S

any mappers wanna tell me how to get the water visible?

(all i'm using for the water is a plane 1x1points and 200x200size 2pass material, type:water, textures are out of the texture pack on the westwood FTP)

level edit:

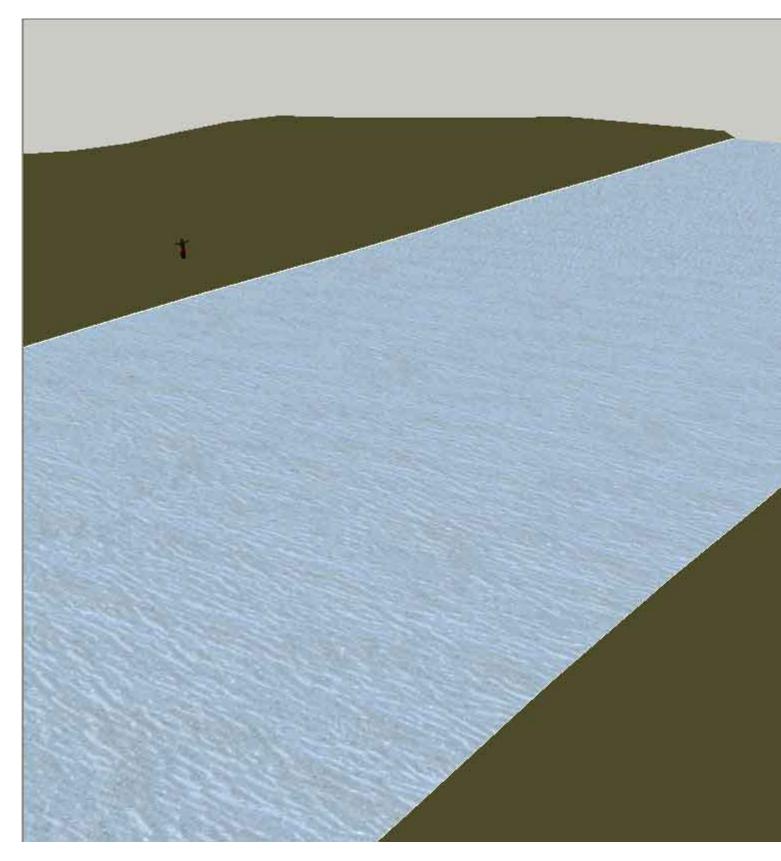

in game:
