First off, thanks for all the help from ya'll so far.

When I go to connect to a server, it'll say the game is full even though on the server list it is like 23/30 or something like that. Why is it saying this and how do I enter the server then?

How do you private message someone in the game? I've looked around the wiki and the in game controls, but I have not found anything.

Lastly, is there a way to improve your kbps after changing the internet settings from auto to cable (my connection)? Because now I'm making an average of 90-100 on most servers and 60-70 on a few servers.
