Subject: minefield script ; value
Posted by R315r4z0r on Wed, 12 Apr 2006 06:46:54 GMT

now, I think I may of made this same post a wile back... but I havent mapped in months, and I forgot.

When making a mine field, using the script "JFW_Blow_Up_On_Enter" how do I tell it to use the Proximity c4 explotion?

In parameters it says explosion, what do I put in value for proxy explosion?
